

dedicated hosting

by bluehost

money-back guarantee

Try us and love us, or get a refund any time. You're never locked into a contract and there are no hidden fees or gimmicks.

free domain

Every Bluehost account includes a free 1-year domain name registration. You can even apply it to a transferred domain.

24/7 support

Trained, in-house experts are here to help 24/7. Our robust help center includes guides, video tutorials and more.

a server to call your own

With an entire Bluehost server at your disposal, your websites experience the best performance possible while you enjoy advanced control and security.

What is dedicated hosting?

For those requiring the ultimate in performance and control, a dedicated server is ideal. Unlike shared and VPS solutions, dedicated customers enjoy 100% of all available resources on an entire server. They may dictate the configuration and run whichever software they desire. And thanks to the optimized data systems maintained by Bluehost engineers and administrators, the benefits of a dedicated server are still both accessible and affordable.

Who uses dedicated hosting?

- Anyone requiring complete server control
- Those requiring truly dedicated resources and storage
- Those needing root access
- Anyone wishing to fully customize their server environment
- Users hosting sites with medium to high levels of traffic

great for:

Substantial eCommerce operations

Customers operating many significant websites

Fast-growing small and medium-sized businesses

\$74.99* first month	\$99.99* first month	\$124.99* first month
standard	enhanced	premium
renews at \$149.99/mo	renews at \$199.99/mo	renews at \$249.99/mo
2 x 2.3 GHz dual core CPU	4 x 2.5 GHz quad core CPU	4 x 3.3 GHz quad core CPU
4GB available RAM	8GB available RAM	16GB available RAM
500GB storage (mirrored)	1 TB storage (mirrored)	1 TB storage (mirrored)
5TB bandwidth	10TB bandwidth	15TB bandwidth
3 IP	4 IP	5 IP

Every Bluehost account has new functionality that makes maximum power possible

extreme speed

Each server is custom built in-house by our engineers using only the latest technology. And our use of open source technology like OpenStack gives us the flexibility to upgrade performance over time.

instant provisioning

Whereas most dedicated solutions take hours or days to activate, our technology allows us to provision dedicated servers immediately. Your server is standing by so it's ready for you the second you need it.

RAID storage

We use only high quality storage with RAID level 1 support on dedicated servers. Your drives are completely mirrored, ensuring your data is extremely well protected. This feature is not found on most dedicated solutions.

storage upgrades

Add hosting storage on the fly as you need it. With our enhanced cPanel, you can increase available SAN storage space in real time without requiring admin intervention.

enhanced cPanel

Every dedicated configuration includes the option of our enhanced cPanel-based interface which makes it easy to manage all of your websites, domains, emails, resources and more from one central location, including special tools for WHM control.

root access

For advanced users, our improved control panel offers complete access to CentOS, giving you full control of your server.

multi-server management

Need more than one hosting service? You can add shared, VPS, or even additional dedicated hosting services to your existing account and manage all of them in one place.

access control

Create passwords that grant access to specific areas of your account. Generate one for cPanel only, one for billing and account information, and/or a master password for everything.

advanced capabilities

- FTP Access
- Web File Manager
- Secure Shell (SSH) access
- Server-side includes
- Hotlink protection
- .htaccess override support
- Control Port Access
- Log files
- Website Statistics
- Open PGP/GPG Encryption
- Custom cronjobs
- Custom error pages
- Custom PHP/INI files
- Full root access
- JAVA
- FFMPEG
- WHM
